

# The Rapid, Low-Cost Alternative to NGS for SARS-CoV-2 Variant Surveillance

## Process 1000s of Samples in a Single Workday on a Single Instrument

The high-throughput MassARRAY® SARS-CoV-2 Variant Panel (RUO) enables rapid, cost-effective detection and differentiation of key SARS-CoV-2 variants of concern - all at a fraction of the complexity and cost of sequencing-based technologies.

### Get Robust Testing on the MassARRAY® System

- High throughput
- Accurate detection
- Simplified interpretation
- Under \$25 per sample
